

Malling™ Bella

Mid-season primocane

Well suited to double cropping

Excellent long cane production

Attractive, firm, and glossy berries

Good shelf life

Fruit quality

Malling™ Bella has very attractive mid-red fruit that remains bright and firm, with excellent flavour and shelf-life. It has large berries, with a mean berry weight of 7 g, and maintains good size through the season.

Production period

A mid-season primocane variety, Malling™ Bella is well adapted to UK and southern Europe. The variety is suitable for double cropping and long-cane production.

Growth habit

Malling™ Bella has very productive and vigorous upright canes, with well displayed fruit, providing for fast picking.

Disease resistance

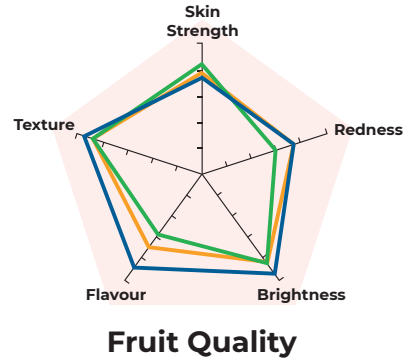

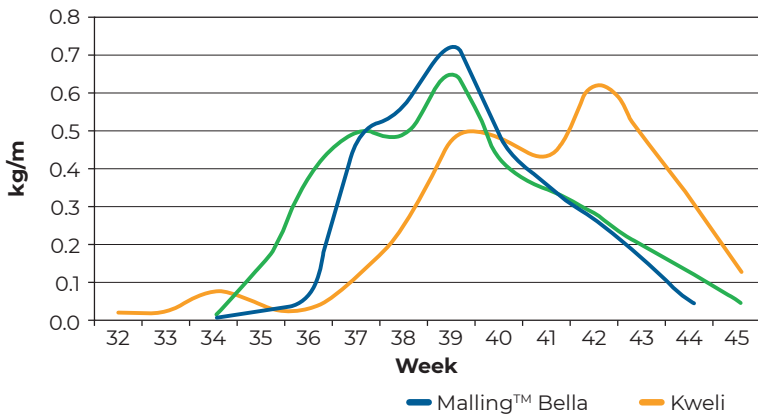

No disease resistance testing has yet been undertaken. However, no problems have been reported from trial sites or nursery beds.
