

Malling™ Champion

Early high-yielding Everbearer

Good disease resistance

Firm and well-presented fruit

Good shelf-life

Fruit quality

Malling™ Champion produces regular, conic-shaped berries with very good skin and flesh firmness.

Production period

The variety has early production potential, and produces its peak harvest in July and picks steadily through August, with an average yield of 1 kg/plant.

Growth habit

Malling™ Champion plants have a compact habit, with low vegetative growth. The fruit is very well presented on long-trusses, allowing for easy harvesting.

Disease resistance

Malling™ Champion shows resistance to crown rot and verticillium wilt, and moderate resistance to powdery mildew.
